

GOAL 1 OF 5

Format 2 · Action & accountability

G1 **Watershed Health**

SMART GOAL STATEMENT

By June 2032, restore 40 miles of priority riparian and stream habitat and move 3 sub-watersheds from “fair” to “good” on the Basin Health Index, verified by annual monitoring.

KEY PERFORMANCE INDICATORS

Indicator	Baseline 2026	Target 2032
Priority stream miles restored (cumulative)	0 mi	40 mi
Sub-watersheds rated “good” on Basin Health Index	1 of 9	4 of 9
Acre-feet kept in-stream via voluntary agreements (peak season)	0	5,000 AF
Active community-science monitoring sites	6	30

FY2027 ACTIONS FOR THIS GOAL

Action	Owner	When	Success measure
Complete engineering design for the Elk Fork riparian restoration (Phase 1)	Watershed Program Lead	Q1–Q2	Design at 90%; permits submitted
Sign voluntary in-stream flow agreements with 3 valley irrigators	Water Partnerships Coord.	Q2–Q4	3 agreements; 1,200 AF committed
Stand up 8 new community-science monitoring sites	Monitoring Specialist	Q1–Q3	8 sites live; volunteers trained

Owners report status each quarter. The board reviews the KPI dashboard at mid-year and year-end.
